# Texsun Pools

*Serving Your Neighborhood Since 1982!*

## We have you covered

When searching for a professional to conduct any type of service at or around your home, it's important to confirm they are insured in case an unforeseen incident were to occur. You can confirm insurance is carried by any pool maintenance company by requesting to view a current Certificate of Insurance. You can then contact the insurance company to verify the policy is current. This protects the homeowner from any property damage and injuries caused by the professional at your property.

Texsun Pools understands the importance of protecting both the homeowner and its employees by carrying a \$1 million liability insurance including workers' compensation for all it's employees.

Knowing that the professional you have hired is covered if an accident or injury were to occur will bring an important piece of mind.

- **Liability Insurance** - Covers property damage and injuries caused by the service professionals work.
- **Worker's Compensation** - Provides payments to injured workers, without regard to who was at fault in the accident, for lost wages and medical services.

For your convenience, a copy of Texsun Pool's Certificate of Insurance has been attached to the end of this document.
